SUMMARY

Senior Frontend Engineer with 8+ years of experience building and scaling product-grade solutions for fintech, cryptocurrency startups, and corporate B2B sectors. Led distributed teams (3-5 engineers) in developing applications for 50,000+ internal users at Eastern Europe's largest financial institution. Strong architectural and leadership skills, driving projects from MVP to legacy support with focus on stability, performance, and code quality. Combines deep frontend expertise with full-stack capabilities and AI integration (OpenAI GPT, GigaChat). Effective in international environments and fluent in English, Hebrew, and Russian.

TECHNICAL SKILLS

- **Core Frontend:** React 18, Next.js 14, TypeScript, Redux, Zustand, HTML5, CSS3
- **Styling & UI:** Tailwind CSS, Material-UI
- **Backend & APIs:** Node.js, Python, GraphQL, REST
- **Architecture & Tools:** Micro-frontends (Module Federation), UI Kit, Vite, Webpack
- **Testing & QA:** Jest
- **DevOps & Cloud:** AWS, Docker, CI/CD (GitHub Actions, Jenkins)
- **AI Integration:** OpenAI GPT, GigaChat API
- **Soft Skills:** Team Leadership, Technical Documentation, Process Standardization, Mentoring, Cross-functional Communication

PROFESSIONAL EXPERIENCE

Senior Frontend Developer & Team Lead | Sberbank-Technology (Remote)

Dec 2024 – Present

Sberbank is the largest bank in Eastern Europe. Developed an internal presentation and commercial proposal builder for the corporate sales division.

- Led a distributed frontend team (3-5 developers).
- Architected and implemented AI-driven features using GigaChat API to generate dynamic content templates.
- Established development processes, code review standards, and CI/CD pipelines, reducing defects per release by ~50%.
- **Key Achievements:**
 - Reduced presentation preparation time from 8 hours to ~1 hour (–87%) through AI templates.
 - Improved application loading speed by ≈40% through performance optimization.
 - Doubled the success rate of internal production releases by implementing standardized processes.

Full-stack Developer | Krayon (Tel Aviv, Israel)

Jul 2023 – Aug 2024

Krayon is a cryptocurrency startup developing an MPC (Multi-Party Computation) wallet for secure digital asset management. The company operated at seed-stage with tens of thousands of users.

- Developed a UI kit from scratch.
- Engineered key user-facing features based on customer feedback:
 - **'Gas Station'** – automated commission optimization.
 - **'Sub-account'** – enabled creation of subsidiary wallets with customizable permissions.
 - **'Transaction Simulator'** – preview of network fees before confirming operations, decreasing failed transactions by ~25%.
 - **'Batch Payments'** – bulk transfer functionality, reducing processing time for mass payments by 70%.
 - **'Recurring Transfers'** – automated scheduled payments for subscription models.
- Built an intelligent FAQ chat system using OpenAI GPT, reducing support tickets by **~35%**.
- **Key Achievements:**
 - Accelerated feature development speed by **25%** through the implementation of a unified UI kit.
 - Improved deployment reliability – automated testing now covers **~85%** of critical user flows.
 - **30%** of active users adopted new features within the first month post-release.

Senior Frontend Developer | Coinmama (Tel Aviv, Israel)

Feb 2022 – May 2023

Coinmama is a regulated cryptocurrency exchange platform serving millions of users across multiple jurisdictions (US, EU, Israel).

- Led the migration from a monolithic PHP/CSS codebase to a modern micro-frontend architecture using Module Federation.
- Resolved critical full-stack bugs across the application.
- Developed and maintained KYC/AML forms for different regulatory regions.
- **Key Achievements:**
 - Reduced deployment time by 50% through isolated releases.
 - Increased automated test coverage to catch **~80%** of bugs before production.

Frontend Developer | Be The Bank (Tel Aviv, Israel)

2019 – Feb 2022

Be The Bank is an Israeli fintech company providing P2P solutions for emerging markets.

- Spearheaded the migration from Angular to React.
- Developed a secure KYC system.
- Built a new MVP for an African market credit transaction and goods accounting app.
- **Key Achievements:**
 - Increased feature development speed by 40% after the technology migration.
 - Reduced user verification errors by 25% through improved UX and system design.

Frontend Web Developer | Morizo Digital (Nizhny Novgorod, Russia)

2016 – 2019

Morizo Digital is a full-service digital agency specializing in web development, design, and online marketing for a diverse client portfolio.

- Developed and maintained frontends for various client projects, including a government city portal and e-commerce sites.

Webmaster & SEO Specialist | Livesocionics (Nizhny Novgorod, Russia)

2011 – 2015

Livesocionics is an online studio focused on sociocultural projects, offering testing, consulting, and educational content.

- Full website development, support, and SEO/SMM management, including PPC campaign setup (Yandex Direct, Google AdWords).

EDUCATION

- **MSc in Computer Software Engineering**
State University of Nizhny Novgorod (UNN) | 2004 – 2010
- **Software Development Integration Course**
Tel-Ran Educational Center (Rehovot, Israel) | 2019

LANGUAGES

- **Russian:** Native
- **English:** Advanced (C1)
- **Hebrew:** Intermediate (B1/B2)
